

To use Eskaton's Citrix system on a Mac, follow these instructions to install and login to Citrix Workspace. Do not install Citrix Receiver, as that is obsolete. Once you have installed Citrix Workspace and logged in the first time, you will not have to do this again. Your work applications will be available from the Citrix icon in the menu bar.

**Use this link to go directly to the latest Citrix Workspace installer:**

<https://www.citrix.com/downloads/workspace-app/mac/workspace-app-for-mac-latest.html>

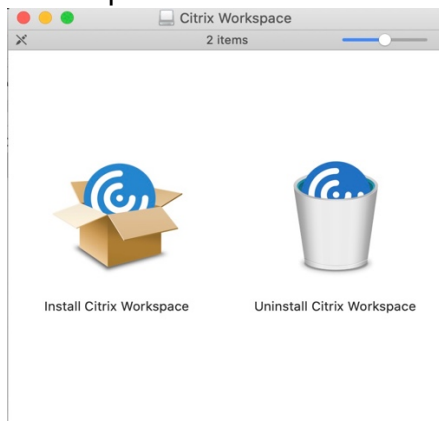

Or if that link is out of date, go up one level:

<https://www.citrix.com/downloads/workspace-app/mac/>

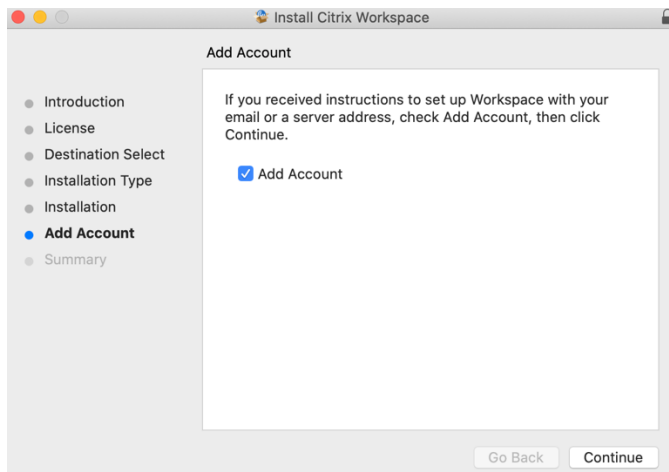

When Download finishes, open it:

**CitrixWorkspaceApp.dmg**

It will open this window:

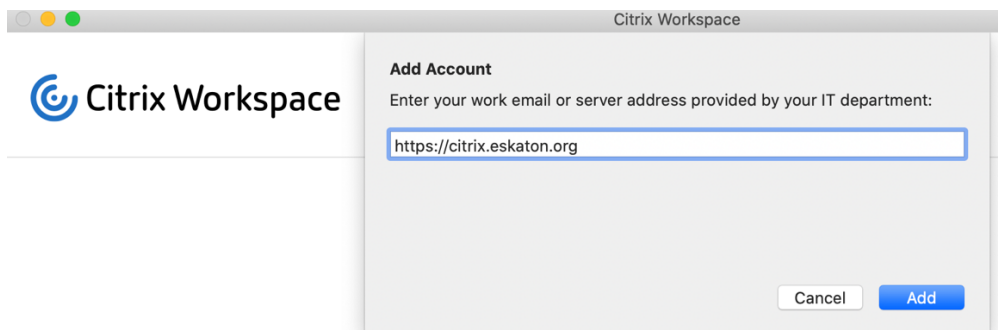

**Double-click the 'Install Citrix Workspace' icon** and follow the prompts until it completes. To allow the installation, it prompts for your username and password (or fingerprint). This is your Mac username and password, NOT your work username. As it completes the installation, it asks if you wish '**Add an Account**'. **Check the box** and click **Continue**.

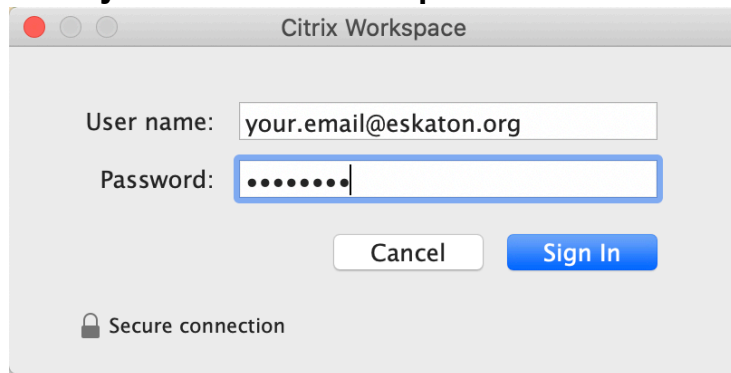

This finishes the installation. Click **Close**.

**Next**, it will ask if you want to move the installer to the Trash. This is your choice. One reason not to Trash it, is if you later want to run the 'Uninstall Citrix Workspace'.

**The Citrix Workspace window is now open and you can enter <https://citrix.eskaton.org> and click Add**

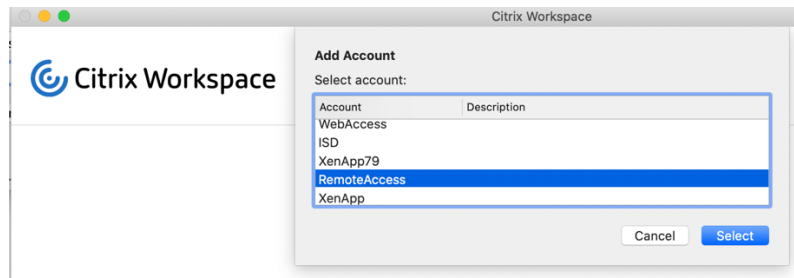

**Enter your work email and password:**

A screenshot of the Citrix Workspace login window. The window has a title bar with standard macOS window controls (red, yellow, green buttons) and the text 'Citrix Workspace'. Inside, there are two input fields: 'User name:' with the text 'your.email@eskaton.org' and 'Password:' with masked characters '.....'. Below the password field are two buttons: 'Cancel' and 'Sign In'. At the bottom left, there is a lock icon and the text 'Secure connection'.

**Select 'RemoteAccess' from the list:**

A screenshot of the Citrix Workspace application window with an 'Add Account' dialog box open. The dialog box has a title bar with 'Citrix Workspace' and a subtitle 'Add Account'. It contains a 'Select account:' label and a table with two columns: 'Account' and 'Description'. The table lists four accounts: 'WebAccess', 'ISD', 'XenApp79', and 'RemoteAccess' (which is highlighted with a blue selection bar), and 'XenApp'. At the bottom right of the dialog are 'Cancel' and 'Select' buttons.

Account	Description
WebAccess	
ISD	
XenApp79	
RemoteAccess	
XenApp	

That's all! You're ready to work!

After this, you'll find all your Applications in the newly installed 'Citrix Workspace' app icon in your menu bar.
